ABOUT

A highly motivated software developer with expertise in Java, Python, and database management, specializing in designing and developing scalable applications. Proficient in data structures, algorithms, and web development, with a strong analytical mindset for solving complex problems. Continuously committed to enhancing technical skills and staying updated with emerging technologies to drive innovation and efficiency

EDUCATION

SRM Institute of Science and Technology — August 2023 - June 2027
Bachelor of Technology in Computer Science and Engineering — Chennai, India
specialization in Data Science (CGPA of 9.27)

PROJECTS

Bank Management System (Java, DB Connectivity) — September 2023
Developed a menu-driven bank management system with database connectivity, enabling account creation, transactions, balance inquiries, and interest calculations.

Credit Card Fraud Detection System (Machine Learning, Python, DB) — October 2024
Developed a fraud detection system using machine learning algorithms to analyze transaction patterns and detect anomalies. Integrated Python, data preprocessing, and database management for real-time fraud detection

Financial Tracker (AOOP, Java Swing, DB) — January 2025
Developed a Financial Tracker using Java Swing with database integration, enabling users to manage expenses, track income, and generate reports.

CERTIFICATION

C Programming for Beginners – Master the C Language, Udemy
Advanced C++ 11/14/17/20 Programming – 34 hrs. course in 12 days, Udemy

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, SQL
Developer Tools: VS Code, Git, Google Cloud Platform
Technologies/Frameworks: Flask, React.js, Java Spring Boot, OpenCV, Linux, IoT
Soft Skills: Project Management, Time Management, Effective Communication, Leadership, Problem-Solving & Critical Thinking
